Overview

A **dedicated** and **passionate professional** with a **deep-rooted** interest in advancing the field of **education through technology**. While my **initial aspiration** was to serve as a **Professor** at a **reputed educational institution**, I embarked on a **practical journey** in the **tech industry as a Data Engineer**. This strategic choice was driven by my desire **to gain hands-on experience** and a **comprehensive understanding** of the complexities within the Computers and IT field, especially **in solving real-world problems**. With a solid foundation in data engineering acquired during my Bachelor's internship and subsequent professional roles, I am now **eager to leverage my industry experience to inspire and educate the next generation of technology innovators**. My journey has **equipped** me with not just technical skills, but a unique perspective on how **theoretical concepts apply in practical scenarios**, an insight I am **enthusiastic** about sharing in an academic setting.

Personal Details

- **Gender:** Female
- **DOB:** 19th September, 2000
- **Languages Known:** English, Gujarati, Hindi
- **Nationality:** Indian
- **Hobbies:** Learning new technologies, Writing poems, Playing Keyboard & Guitar, Listening to good music

Personal Profile

- I have around **3.5 years** of experience in **Data Engineering, Cloud Operations, Teaching and Training**.
- I have worked in procuring the **infrastructural cloud resources** using **IaC (Terraform)** in **Azure**.
- I have worked in building **Azure Data Factory** pipelines for data orchestration in **Azure SQL Server** and performing some transformations by executing the stored procedures on the top of gathered data which then goes for visualization.
- I have also worked in **PowerBI** for building interactive dashboards using the data in **SQL Database**.
- I have a technical knowledge of **Snowflake** as I have worked in developing the stored procedures in Snowflake and even **Snowpark**.
- I have even a good knowledge of machine learning as I have worked in developing a **ML model** using **Python (Pandas, Snowpark)** for Demand Forecasting and Pricing use-case.
- I have also a good knowledge of **Streamlit** as I have worked in Streamlit by developing a webapp for visualization of final predicted results of a ML model.
- I have worked in performing **Natural Language Processing (NLP)** operations like **Sentiment Analysis, Diarization, Summarization**, extracting **Resolution**, extracting **Root Cause** on the text data extracted from audio data files.
- Looking forward to serve as an engineer with an **appreciated** and **positive working place** which aims at **upliftment and growth** in terms of employees at an individual level which eventually grows at the management level as well.
- I am eager to seek the opportunity to present my **skills, talents and interests**.
- Positive attitude will encourage me to **work efficiently**.
- I am also a **dedicated team player** which will in turn help me growing as a collaborative member of the team.

Personal Profile

- I have trained and taught various subjects to **B.Tech.** students according to my expertise and worked as a **Assistant Professor** at **Parul University, Vadodara** employed from **byteXL**.
- I have taught subjects like **Azure Fundamentals** dealing with various services of Azure.
- Azure Fundamentals revolved through the basic concepts of Azure **IaaS, PaaS and SaaS, IAM, Storage, Pricing, SLA**, etc.. services in Azure.
- I have also trained the B.Tech. students in **DSA with C** language.
- I have taught them how to implement the concepts like **Stack, Queue, Linked List, Trees, Graphs, etc..** and their algorithms in **C language**.
- As I have worked in academics institution, I also have good experience in conducting **practical and viva examinations** along with serving all the required responsibilities as a **Assistant Professor** in a engineering institute.

Educational History

Masters of Technology (2023-2025)

- Gandhinagar Institute of Technology, Kalol
- Gandhinagar University

Bachlors of Technology (2018 - 2022)

- Shree Swaminarayan Institute of Technology, Bhat
- Gujarat Technological University
- Scored: 96%

Certifications

- Azure Data Fundamentals (DP - 900)
- Azure Data Engineer Associate (DP - 203)
- SnowPro Core

Publications

- **Scopus Indexed:** Viha Dave, Dhaval Chudasama. "Enhancing Fraud Detection in UPI Transactions using Ensemble Learning and Neural Networks". "Journal of Information Systems Engineering and Management". 10(45s). 55-67. 2468-4376. <https://doi.org/10.52783/jisem.v10i45s.8708>
- **UGC Approved:** Viha Dave, Dhaval Chudasama. "Fraud Detection in UPI Transactions using Ensemble Learning". "International Journal of Creative Research Thoughts". 13(4). o337-o337. 2320-2882

Technical Skills

- **Languages:** C, Python
- **Framework:** Django, Streamlit, PySpark, Ones related to ML
- **Database:** SQL, Snowflake
- **Orchestration tools:** Azure Data Factory
- **Visualization tools:** PowerBI, Streamlit
- **Cloud:** Azure, AWS
- **IDE:** Visual Studio Code

Soft Skills

- Good Communication skills
- Client Interaction
- Team collaboration
- Team playing
- Mentoring Juniors
- Problem Solving
- Analytical Thinking
- Time management

Internships

- **Python Internship:** Aakash Techno Labs
- **Android - Flutter Internship:** Orion Touch Technologies

Professional Experience

Anblicks Inc. (2022) (Data Engineering)

Project - 1: Call Center data analytics

Description: We had been given audio files and we processed to convert audio to text and loaded the data in Snowflake tables. Then performed some NLP operations like sentiment analysis, diarization, summarization, resolution, root cause, etc.. on that data to gain some useful insights and then visualized the data using Streamlit dashboard.

Responsibilities:

- Converting audio to text using Whisper.
- Performing sentiment analysis on the data using hugging face models.
- Getting speaker wise text conversion by performing diarization.
- Getting summary, resolution and root cause from the data.
- Visualizing the data using Streamlit dashboard.

Project - 2: Chatbot using AWS Lex

Description: We had some predefined requirements which needed to be fulfilled by making some necessary changes in the AWS Lex chatbot and AWS Lambda code.

Responsibilities:

- Adding the required utterances in the respective intents.
- Adding the synonyms of the required terms.
- Updating the config file for returning required answers for questions or terms used in the chatbot input.
- Changing the AWS Lambda code.

Project - 3: Retail data analytics and visualization

Description: Developed the ML model to execute on top of the retail data to get some business insights through visualization in Streamlit. There were various usecases out of which Demand Forecasting and Pricing are the ones.

Responsibilities:

- EDA part of the gathered data using Python (Pandas) and Snowpark.
- Developing the ML model in Python and Snowpark.
- Creating tasks in Snowflake to automate the scheduling process as much as possible.
- Aggregating the required data for visualization in Streamlit by creating the views out of result tables.
- Deploying the model in Streamlit cloud.
- Developing the Streamlit dashboard for visualization.

Professional Experience

1. Anblicks Inc.

(Data Engineering)

Project - 4: Financial Data Orchestration and Visualization

Description: Fetched data from various ERP systems of the client along with data sources like Oracle and migrated to Azure SQL Database and Snowflake using Azure Data Factory pipelines. Pulled the data from Azure SQL Database and then built interactive PowerBI dashboards for visualization.

Responsibilities:

- Developing Azure Data Factory pipelines for fetching the data from various data sources to Azure SQL Database.
- Developing stored procedures in Azure SQL and Snowflake for transformation.
- Creating the views in Azure SQL Database in order to pull the data from them into PowerBI.
- Building the dashboard in PowerBI for visualization purpose.

Project - 5: Transform and copy data into Snowflake using Azure Data Factory

Description: Fetched some sample data from Azure Blob Storage into Azure Data Factory and performed some transformations on the data. Copied that transformed data to Snowflake table. For authentication, used Azure Key Vault.

Responsibilities:

- Procuring the Azure resources using IaC (Terraform)
- Developing Azure DevOps pipeline for provisioning of the required resources.
- Developing the Azure Data Factory pipeline for transforming and loading the data to Snowflake tables.

Professional Experience

2. byteXL – Parul University (2024) (Teaching and Training)

Subject: Azure Fundamentals

Overview: Trained B.Tech. students in clearing their basic fundamentals of Azure cloud.

Description:

- ·Cleared the basic fundamental concepts of cloud computing and its architecture with some terminologies.
- ·Made familiar with Microsoft Azure cloud and have driven through the services of Azure cloud.
- ·Taught and explained how IaaS, Paas, SaaS services in Azure work along with services dealing with IAM, Storage, Pricing, SLA, etc..

Subject: DSA with C

Overview: Trained B.Tech. students in Data Structure concepts.

Description:

- ·Taught the concepts of analysis of algorithms with asymptotic notations.
- ·Taught data structure concepts like stack, queue, linked list, trees, graphs, hashing, sorting, searching, etc..
- ·Explained how these data structures are implemented in C language with their suitable algorithms.

Subject: Python Full Stack Development

Overview: Trained B.Tech. students in web development using Python frameworks.

Description:

- ·Taught the concepts of basic Python programming.
- ·Trained the students with basic web development concepts.
- ·Introduced the Python web frameworks like Flask and Django to students and trained building attractive and user friendly web applications.
